

# Growing Crops in Year 3

Year 3 had great fun planting crops in their raised bed on 17<sup>th</sup> May. The crops they are growing are: runner beans, peas, cherry tomatoes and strawberries.

This is supporting their understanding of the life cycle of a plant and its key purpose to re-produce. It will provide first-hand experience of watching their plants grow, form a flower, and produce a seed that will develop into a fruit or vegetable that they can eat.

It also shows the children how easy it is to grow their own fresh fruit and vegetables. We hope that this will provide lasting memories, experiences and skills that they will transfer into adulthood.
