

Year 5 visit St Paul's School for Girls

On **Thursday 14th July 2016** Year 5 visited St Paul's School for Girls for a day of Design and Technology. The children were given the opportunity to design and make LED torches, see a 3D printer in action, make their own Snozzcumber and Frobscottle from the BFG and then complete a sewing machine driving test. It was a thoroughly enjoyable day and was great to see the children learning and developing design and technology skills which can be applied to our own Creative Curriculum. Well done everyone and a big thank you to St Pauls' School for Girls for arranging such a fun packed trip.
