

# Reception Class Visit to the Thinktank Museum

On Thursday 30<sup>th</sup> June Reception Class went along to the Thinktank Museum to learn everything there is to know about Science! They went to a workshop that helped them to explore how their bodies worked and what they should put into them to help them to grow healthy and strong. They listened to each other's heartbeats before and after exercise and used a doll to look inside their bodies at their intestines.

Reception Class enjoyed playing in the science garden where they tested how to make water travel uphill, how to make wheelchairs access different surfaces and they even used a human balance scale to test each other's weight!

They absolutely loved exploring the animal bones section, trying to decide what each animal had once been. They lay down along the crocodile bones and they discovered that even Mrs Lake wasn't as long as a crocodile!! They saw a huge fossil and recalled the fossil work they had done in class with Mrs Harlow.

Playing on the pretend street, using the telephones to call each other at the dentist, health centre and high street was a highlight of the day. In the health centre they used the x-ray machine to look at human bones and teeth. They loved fixing the pipes under the ground and making animations of each other in the cartoon workshop.

A busy, fun filled day!
