

Preparations for Health for Life Spring Planting

On **Friday 17th February 2017** we practised making paper plant pots ready for spring planting. Each member of the committee selected seeds for their class to plant after consulting with them earlier in the term. All seeds are now in classes. Health4Life members will be able to support other children to make plant pots as they are started off indoors before being planted in the raised beds which are allocated to each class.
