

Digital Leaders visit the Apple Store

On **Friday 14th July 2017** the Digital Leaders group spent the morning at the Apple Store using some of the latest iPads and learning how to code using Apple's new Swift Playground software. Afterwards, they even had a chance to find some bears in Cathedral Square before catching the bus back to school! It was an amazing experience which has inspired our digital experts to download the software on their devices at home and start coding over the summer holidays.
