

On **Thursday 24th May 2018** Years 2 and 4 enjoyed a visit from dental students from the University of Birmingham. Each class split into groups and each group had practical lessons on ways to look after our teeth. They learned about healthy eating and estimating the amount of sugar in snacks.

Some children dressed up as dentists and they learned about what happens when they visit the dentist. Finally, each group had a lesson on effective teeth brushing and the children found out how clean their teeth were by using special coloured dye. It was a fabulous visit, enjoyed by all.
