

On **Thursday 21st June 2018** Francesca, her parents and Miss O'Connell were invited to the annual Ogden Trust Physicist of the Year Awards held at Birmingham University.

The evening began with a workshop highlighting the different aspects of Physics and some of the work carried out at the university.

There was then a presentation a professor of the university and a representative from the Ogden Trust, during which Francesca and other pupils from Year 6 in other schools received their awards.

To complete the evening Dr Jenny Watson led a workshop 'Physics is cool' which explored temperature - hot and cold and the children were able to help out and be involved in these.

Overall it was an excellent evening and Francesca and her family are invited back in October 2018 to the University's Open Day.
