

Avoncroft Museum

Year 2 visited Avoncroft Museum of Buildings on **11th July 2018** to investigate structures and the building process as well as look at some buildings from the past. They had a fabulous time learning about wattle and daub and it was fun working as a team to build a wall. Brick making was another skill they tried and we learned two different ways to make a brick. It's not as easy as you think! There were so many historic buildings to explore from Tudor homes to air raid shelters and even a windmill. There was so much to see and not enough time but Year 2 were given a free pass to go back and see the museum again.
