

Science Week 2019

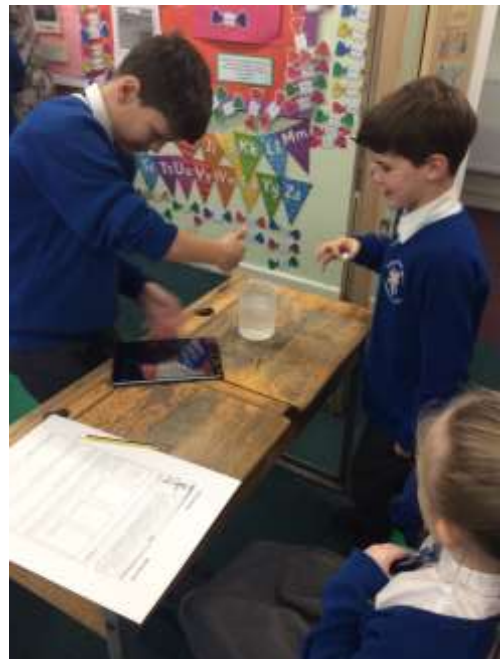

During the week of 11th-15th March 2019, pupils at Our Lady of Fatima Catholic Primary School enjoyed taking part in a week filled with learning about Science, famous scientists, carrying out science investigations and presenting their hypotheses.

Some of the children from KS1 and KS2 presented science research in a variety of ways. The science projects were fantastic and engaging; so much hard work and effort had been put into the research and the children had clearly had fun learning as they researched.

During the week, all of the children had the opportunity to work with other classes to plan and carry out an investigation. The investigations included, how to make a lava lamp, Which material float, How can we look after our teeth and many more!

To complete Science Week the children were able to dress up as scientists. They were also invited to the Finals of the Science Fair.

Science Fair Winners:

KS1:

1st Joshua: Can salt help to conduct electricity?

2nd Josh: What happens to an egg in vinegar?

3rd Madalen: Do all lights make a rainbow

KS2:

1st Laura: How to make a balloon inflate using baking soda and vinegar

2nd Alessio: Static electricity

3rd Luis: Density
